Mathematical Economics - B.A.

The mathematical economics major offers students a degree program that combines mathematics, statistics, and economics. In today’s increasingly complicated international business world, a strong preparation in the fundamentals of both economics and mathematics is crucial to success. This degree program is designed to prepare a student to go directly into the business world with skills that are in high demand, or to go on to graduate study in economics or finance. A degree in mathematical economics would, for example, prepare a student for the beginning of a career in operations research or actuarial science.

120 hours (minimum)

Any student earning a Bachelor of Arts (BA) degree must complete a minimum of 39 hours at the 300+ level. These hours are generally completed by the major requirements. However, keep this hour requirement in mind as you choose your course work for the requirements in the major. See the complete description of College requirements for a Bachelor of Arts degree in the Arts and Sciences section of the 2022-2023 Undergraduate Bulletin.

UK Core Requirements

See the UK Core section of the 2022-2023 Undergraduate Bulletin for the complete UK Core requirements. The courses listed below are (a) recommended by the college, or (b) required courses that also fulfill UK Core areas. Students should work closely with their advisor to complete the UK Core requirements.

I. Intellectual Inquiry in Arts and Creativity
   Choose one course from approved list.........................................................3

II. Intellectual Inquiry in the Humanities
    Choose one course from approved list.....................................................3

III. Intellectual Inquiry in the Social Sciences
     Choose one course from approved list....................................................3

IV. Intellectual Inquiry in the Natural, Physical, and Mathematical Sciences
    Choose one course from approved list....................................................3

V. Composition and Communication I
   CIS/WRD 110 Composition and Communication I ..................................3

VI. Composition and Communication II
    CIS/WRD 111 Composition and Communication II ..................................3

VII. Quantitative Foundations
     Choose one course from approved list....................................................3

VIII. Statistical Inferential Reasoning
      STA 296 Statistical Methods and Motivations ......................................3

IX. Community, Culture and Citizenship in the USA
    Choose one course from approved list.....................................................3

X. Global Dynamics
    Choose one course from approved list.....................................................3

UK Core hours .........................................................................................30

Graduation Composition and Communication Requirement (GCCR)

ECO 491G Applied Econometrics ..........................................................3

Graduation Composition and Communication Requirement hours (GCCR) .................................................................3

College Requirements

I. Foreign Language (placement exam recommended) .............................0-14

II. Disciplinary Requirements
    a. Natural Science ..................................................................................6
    b. Social Science (completed by Major Requirements) .........................6
    c. Humanities .........................................................................................6

III. Laboratory or Field Work .................................................................1

IV. Race and Ethnicity Requirement .......................................................0-3

V. Electives ..............................................................................................6

College Requirement hours: .................................................................19-36

Premajor Requirements

Choose one of the following two sequences:

MA 113 Calculus I ....................................................................................8
MA 114 Calculus II ..................................................................................8

or

MA 137 Calculus I with Life Science Applications ..............................8
MA 138 Calculus II with Life Science Applications .............................8

Premajor hours: .....................................................................................8

Major Requirements

Mathematics Core Requirements

MA 213 Calculus III ................................................................................4
MA 214 Calculus IV ................................................................................4
MA 320 Introductory Probability ............................................................3
or
STA 524 Probability ...............................................................................3
MA 322 Matrix Algebra and its Applications ........................................3

Mathematics Core hours: .....................................................................13

Economics Core Requirements

ECO 201 Principles of Economics I .....................................................3
ECO 202 Principles of Economics II ....................................................3
ECO 391 Economic and Business Statistics .........................................3
ECO 401 Intermediate Microeconomic Theory ..................................3
ECO 402 Intermediate Macroeconomic Theory ................................3

Economics Core hours: .......................................................................15

Other Course Work Required for the Major

For the Mathematics Component:

Choose one of the following two sequences:

MA 416G Introduction to Optimization
MA 417G Decision Making Under Uncertainty
STA 525 Introductory Statistical Inference ............................................9

OR

MA 416G Advanced Calculus I
MA 417G Advanced Calculus II
MA 417G Decision Making Under Uncertainty ..................................9

For the Economics Component

ECO 491G Applied Econometrics ......................................................3
One 300+ level economics course ......................................................3
One 400+ level economics course ......................................................3

--- CONTINUED ---
Mathematical Economics (B.A.) • 2

For the Statistics Component
Choose STA 296 or a higher level statistics course ...........................................3

Other Major hours: ......................................................................................21

Electives
Choose electives to lead to the minimum total of 120 hours required for graduation...6

Total Minimum hours
Required for Degree .......................................................................................120

*Course used towards completion of a UK Core Requirement.
